Solite Europe - BIM Components

Thank you for downloading this Solite Europe lighting component. This user guide has been included to provide guidance on how to correctly use and make the most of the content.

Loading the family into your project

Please follow the below method to load the component into your project;

1. Open the Revit file containing your 'project' and navigate to an appropriate view. (Plan view is advised).
2. Go to the 'Insert' tab on the Revit Ribbon and select 'Load Family'.

3. Navigate to the location of the saved component that you have previously downloaded from BIMstore.
4. Click OK to load the component into your project. The family is now copied and embedded into your project and can be selected from the components button located on the Architecture tab on the main Revit Ribbon.

Accessing the components specific product information

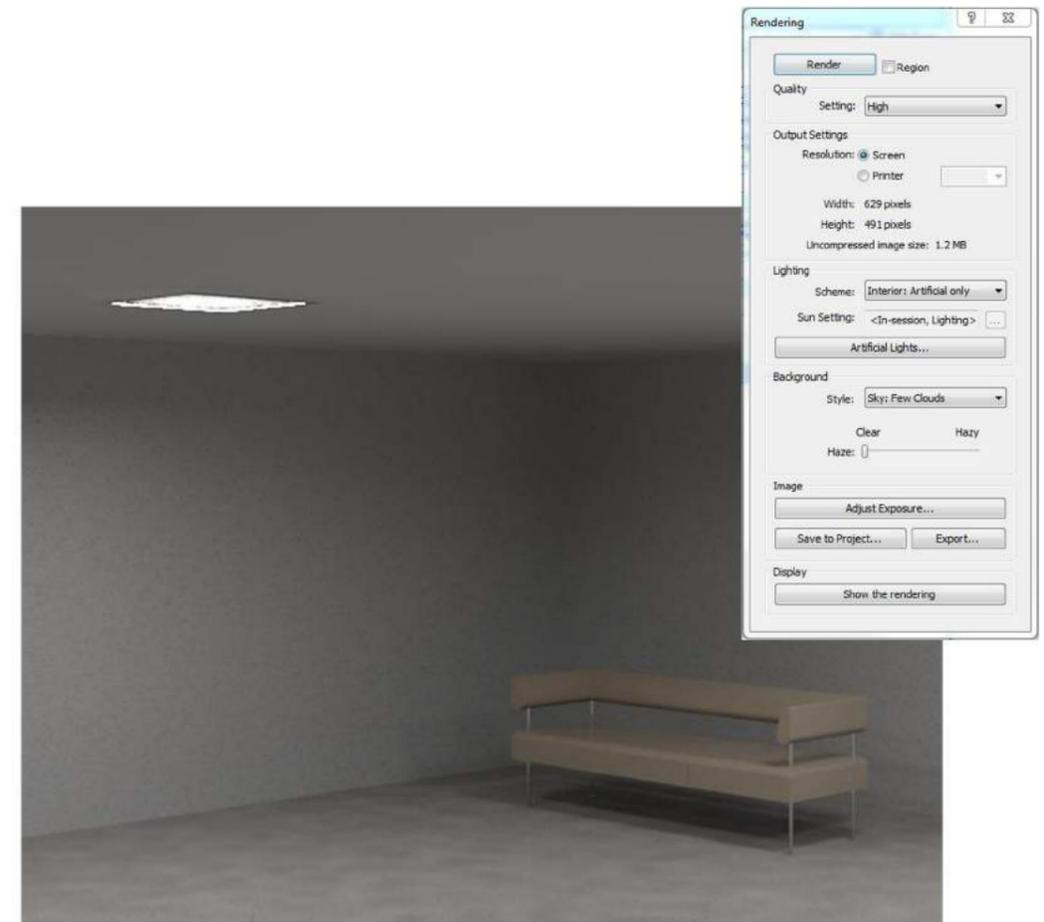

To access the data embedded into the component, simply select the desired component and click 'Edit Type' button at the head of the 'Properties' dialogue box (typically located on the left hand side of the screen). All of the product specific information regarding the component you have selected is now displayed and can be scheduled, including URL links direct to Solite Europe for documentation and product links.

Using the lighting component for Rendering

The lighting component has been created as an Internal Light Fixture so when rendering it is important to select this from the dropdown in the Rendering options box.

1. Interior: Artificial
2. Interior: Sun and Artificial

(Rendering the component is for illustrative purposes only and should be treated as such)

Other Notes

You can add the Solite Europe Lantern to your company template file, they will then be available without loading when starting a new project.
